Baby Safety Set

Our Baby Safety Set contains five essential safety temperature indicators which help to keep a baby/child safe within the home during its early childhood years making it an excellent gift for new mums. The kit is also particularly useful for travelling.

Each kit contains:

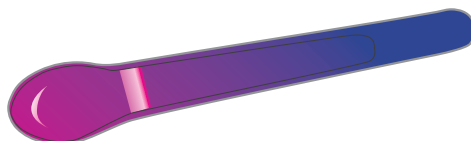

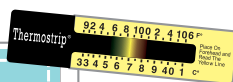

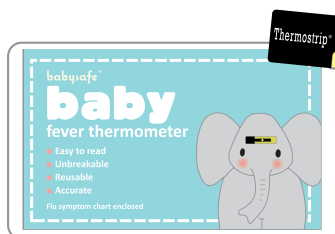

A feeding spoon which will change colour from blue to pink if heated food is 'too hot' for a baby's mouth.

A Nursery Thermometer to monitor the room temperature and comfort.

A non-invasive Forehead Thermometer to easily monitor fever trends.

A Bath Thermometer for bath safety to show when the water temperature is just right, or too hot, or too cold.

A useful Fridge Thermometer to ensure food and milk is stored at the correct temperature.
