# baby range

## Nursery Thermometers

These thermometers provide added safety and reassurance to parents and carers, from the time a baby is born and through their early years, helping to ensure a childsafe environment. This new range incorporates the latest liquid crystal technology, using a unique and easy to read red moving thermometer scale. Nursery thermometers ensure that a baby's bedroom/nursery is kept at a safe temperature.

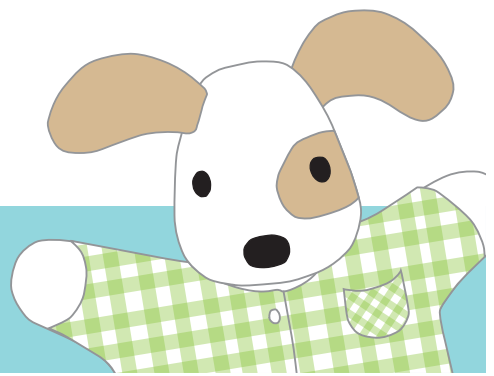

It is important to ensure that a baby does not get too hot or too cold; to reduce the risk of cot death, temperature control while a baby is sleeping is particularly important.

## Bath Thermometers

Protect your baby against scalding and provide a safe and comfortable bath. The unbreakable bath thermometers show when the water is just right, or too hot or cold.

## Forehead Fever Thermometer

An easy to read, reusable and unbreakable thermometer which provides an accurate method for taking your baby's temperature. Also enclosed is a Flu symptom chart.
